

Project Outline

Scope of Work

The main goal is to rebuild the already existing pages (Home, About, Contact) as well as adding a project portfolio page to show case our services and products.

project portfolio page

This page will include a list of different services layed out in a grid formate. A user can click on a [learn more](#) button to load more products in that specific area.

option:

This might be an area to consider the creation of a tool that would allow you to add and update your own projects in your time.

or

I could do this my self and you would not have the tools to update or edit this page as you see fit.

Questions

1. What is the purpose of the website?

- to inform others about our business and company.
- to provide a way for customers to contact us.
- to show our products and services.

2. Will the content of the website ever change?

- if so, what areas and how often?

3. Can I get login access to NameCheap?

4. I would like to put the source code on GitHub and allow others to view it. Is this ok?

- this would help build my profile and I would not include the editor for the project portfolio page.

extra features:

- project portfolio editor
 - this would require an authentication system as well as a possible database to store any edits or updates you have made
 - NameCheap might have some database options.
-

Time Frame and Budget

Budget

- pay: \$30/hr
- 25 - 30 hours per week.
- how do you want me to track my hours?
- is there a max amount you are willing to spend?
- will payment be bi-weekly?

Time frame

Phase 1: Rebuild existing pages and relaunch.

Phase 2: Create product portfolio page and relaunch.
